

Water quality, thanks to saline chlorination, which allows the pool water to be kept clean without the use of chemical products.

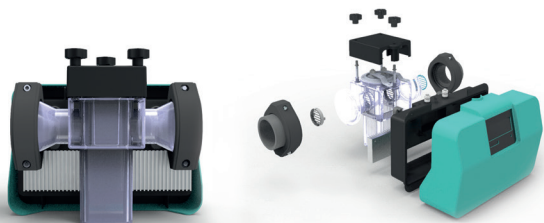

Range of 3 products to cover all sizes of domestic swimming pools. From **15.000 to 55.000 gallons**.

The following table allows the selection of the correct chlorinator model based on the volume (gallons) of the pool.

	QUICKSALT 15	QUICKSALT 40	QUICKSALT 55
POOL VOLUME UP TO	15.000 GALLONS	40.000 GALLONS	55.000 GALLONS
MAXIMUM PRODUCTION (in 24h)	0,53lbs (0,24Kg)	1,1lbs (0,45Kg)	1,55lbs (0,70Kg)

Additional options:

Temperature Probe Kit measures the pool's water temperature and stops the chlorinator in case of low temperatures to protect the life of the production cell.

Easy-to-install salt chlorinator with minimal energy consumption

The **QUICKSALT** salt chlorinator is a solution that respects human health and the environment.

Easy installation

Low electrical consumption

Established in USA

Water quality

Eliminates COVID-19

WHY THE QUICKSALT RANGE?

Easy and fast installation, the product has a compact design so that the connection between the cell and the equipment is already made at the factory.

Economic savings and respect for the environment through the use of high efficiency switch-mode power supplies.

Established in USA.

Excellent box protection against water, gas, and corrosive vapor. The best protection of its kind against external agents that could damage interior electronic cards and other metallic components.
