

OUTSTANDING PROTECTION + LONGEVITY

Ramuc® HB31 is a 3:1 high-build coating that cures to a hard, durable finish that provides excellent stain, chemical, and abrasion resistance. Great for protection of concrete, plaster, and fiberglass swimming pools, spas, and slides. This product cures to a satin finish with excellent coverage rates, especially on previously painted epoxy surfaces. Because of their chemical cure, epoxies are the paints of choice for indoor and outdoor pools alike.

HB31 rolls or sprays easily up to 8 mils dry per coat, rendering “smoothing” qualities on rough surfaces. Two coats offer up to 8 years of service life, making it a superior choice, especially for spas.
